

Take Back Time. Communicate with your Patients Faster and Easier.

Deliver Private Health Information to patients at a rate that is truly amazing using our patented SecuReach[®] communication software system. Do more, every day, without adding staff or re-inventing their work flow. The SecuReach implementation process fits easily into the practice's current work flow. Keep your same staff communicating with patients plus add the benefit of significantly reducing phone tag and eliminating the need to leave general messages that trigger a call back to the office.

Any member of the practice can make 25 outbound calls in the same time 2 outbound calls are completed today. Your practice will have a personalized SecuReach[®] message library that will hold over 100 messages adding consistency to the significant amount of routine medical communication that is sent to your patient population every day.

Do today what you didn't do yesterday. SecuReach will track the "exceptions" within your patient population of what is not happening as you prescribed using the SecuReach Daily Dashboard. Know which patients haven't followed through on a referral, booked that follow up appointment or completed that required diagnostic test. Focus time and energy on the exceptions to otherwise great patient communication.

COMMUNICATION

"SecuReach® has cut down our follow-up from approximately 15% of our practitioner's time to closer to 5% ... this has been an almost \$40,000 savings in the first year, not to mention freeing up NP time to provide revenue producing services. In addition, our customer satisfaction has greatly increased!

Set up was simple. The system is easy to use and can be easily modified to fit your affiliate's specific needs such as using multiple languages so you can reach all your customers. The Daily Alerts are very helpful and the fact that designated SuperUsers can view all of your site's activities, from the convenience of the main office, or even their home ... is fantastic".

-Triste Brooks, CEO

PPHD of Greater Northern New Jersey
