

Prescribe Extra Strength Tracking for your Practice

Do today what you didn't do yesterday. Track the "exceptions" within your patient population of what is not happening as you prescribed. Know which patients haven't followed through on a referral, booked that follow up appointment or completed that required diagnostic test.

Deliver Private Health Information to patients immediately using the patented SecuReach® communication software system. Actively engage with patients using an automated system that makes calls, sends email and text reminders for you.

Imagine standardized contents of routine medical communication permanently documented and identified on a real time, patented, Daily Dashboard Report that communicates directly with practice personnel and physicians.

Do more with the same practice personnel and physician support that you have in your practice today. Place the power of the SecuReach® communication software system into your patient communication work flow and watch the results pay back immediately in saved "phone tag" time and lost revenue for patients that are not compliant with their medical care follow up.

TRACKING

"I have found SecuReach® to be invaluable to my practice. SecuReach is a reliable way to ensure that test results are delivered to patients. SecuReach has totally eliminated the time consuming act of trying to track down patients to inform them of test results. Patients are very pleased with the system and find it easy to use. They like the reliable delivery of their test results as well as the friendly reminders of their scheduled appointments. I would recommend SecuReach without hesitation."

**-Linda T. Swan, MD
OB/GYN**
